STOP THE STING!

JELLYFISH STING NEUTRALIZING GEL

StingMate® consisting of 5% Mentholated acetic acid gel neutralizes jellyfish stings.

StingMate® was developed to neutralize the stinging cells of jellyfish. StingMate® is sold in an easy to carry 4 fl. oz. plastic bottle. The gel suspends any remaining stinging cells left on the body by the jellyfish. After the initial application, the gel is scraped off and reapplied, then rinsed off. We also offer a Jellyfish Sting First Aid Kit which includes: Easy Instructions, Neutralizing Gel, Gloves, Tweezers, Scraper and Hydrocortisone Cream.

Please visit our website for more information about StingMate® You can also check your local beach store for StingMate® products, or order our products online at www.StingMate.com.

- Fishermen
- Beach Goers
- Surfers
- Swimmers
- Snorkelers
- Lifeguards
- Divers
- Vacationers

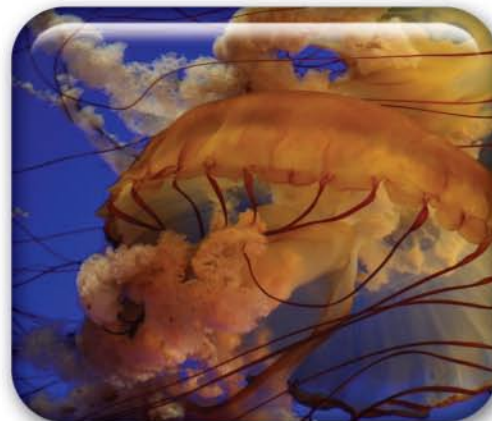

4 Simple Steps:

1. Apply Neutralizing Gel
2. Scrape Off
3. Reapply Gel
4. Rinse Off

FOR BEST RESULTS, APPLY STINGMATE® GEL AS SOON AS POSSIBLE FOLLOWING A JELLYFISH STING. Early application greatly reduces the severity of the sting.

Pacific Coast Sea Nettles

We Tested StingMate® in a Jellyfish Lab!

We believed so much in our product, we flew to a coastal aquarium where reknowned jellyfish researchers tested our product on multiple Pacific Coast Sea Nettles. We didn't just lay a tentacle on our arms, but the entire jellyfish! Two hours after applying StingMate®, only one test subject had minor redness, all other subjects were symptom-free.

BE READY!
